

Migration Acceleration Program

A Results-Driven Framework to Streamline Your Cloud Migration & Modernization Process

Migrate the Right Way With AWS and Mission

As an AWS Migration Acceleration Program (MAP) and Migration Competency partner, Mission has the expertise to successfully migrate you to AWS, unlock financial funding, and mitigate migration risks.

What is MAP?

AWS MAP is a program created to assist organizations in streamlining cloud adoption using AWS services and best practices.

AWS MAP assesses current workloads, calculates the financial benefits of adopting AWS, develops AWS expertise, acquires experience by migrating test workloads, and offers financial assistance to help counter risks commonly associated with large migrations.

How AWS MAP Works

1: Assess Your Readiness

The migration readiness assessment step helps you identify gaps along the six dimensions of the AWS Cloud Adoption Framework (CAF): business, process, people, platform, operations, and security. This assessment enables you to identify the capabilities required in the migration and build a total cost of ownership (TCO) model for your migration project.

2: Mobilize Your Resources

The mobilization step assists in laying a solid operational groundwork for your migration while addressing any capability gaps discovered during the assessment stage. The mobilization stage in AWS MAP helps you make better migration decisions by offering guidance on planning a successful migration.

3: Migrate & Modernize

In this last stage of the process, our AWS-certified Cloud Solutions Architects execute your large-scale migration plan by moving your workloads to AWS and work with you in modernizing and optimizing your new AWS cloud environment.

About Mission

Mission Cloud Services is a leading AWS Premier Tier Services Partner and Cloud Managed Services Provider. Through its dedicated team of expert cloud operations professionals, cloud analysts, and solutions architects, Mission delivers a comprehensive and differentiated suite of agile cloud services designed to help businesses migrate, manage, modernize and optimize their AWS cloud environments, facilitating continuous improvement and delivery across your entire cloud journey.

MAP Benefits with Mission

Tap Into Funding Programs

AWS MAP offers funding to help offset your initial cost of migrating and provides additional business incentives to help you get started with AWS. Mission helps you take full advantage of MAP funding and incentives for all your migration and modernization initiatives.

AWS Migration Expertise

As an AWS MAP and Migration Competency Partner, Mission provides you with the practiced know-how and capabilities required to help you successfully migrate to AWS.

AWS-Certified Cloud Professionals & MAP Ambassadors

Having been trained as AWS MAP Ambassadors, our certified Architects, Engineers, and Consultants possess an expansive depth of AWS migration expertise and cloud experience to streamline and successfully conduct your next large-scale migration project.

Customer Success Story

Examity partnered with Mission to lead its migration to AWS and recommended the Migration Acceleration Program (MAP) to efficiently accelerate the project and reduce costs. For Examity, MAP covered 50% of the project costs. To prepare the AWS environment for the migration, Mission designed an infrastructure for the Examity platform consisting primarily of Amazon EC2, Amazon S3, Amazon Elastic Container Service (ECS), and Amazon RDS. With this new infrastructure, Mission sped up the deployment of development, test, staging, and production environments to reduce software production lifecycles. With its new AWS setup, Examity benefited from improved database response times and served static graphics at an accelerated pace. Mission strengthened Examity's security posture and SOC 2 compliance with end-to-end encryption on AWS EC2 servers. Examity's design, construction, and implementation costs were reduced by 30% through its partnership with Mission.

I have gone through partner selections multiple times with AWS and could see the experience Mission brings to the table for handling migrations like ours. We also considered other partners, but we went with Mission for their knowledge of how to build optimal AWS infrastructures. They also provided excellent references as proof of the quality work they've done for other companies.
