Ensure a Successful Migration to AWS

with a Migration Readiness Assessment (MRA)

Why Choose Mission

Moving to the cloud can be transformative but the initial preparation leading up to a migration is often daunting with so many decisions and budgetary considerations to factor. This is where Mission's Migration Readiness Assessment (MRA) comes into play.

Mission, an AWS Migration Consulting Competency and MAP Partner, consistently ranks first at getting new workloads into the AWS ecosystem and optimized. Our comprehensive MRA leverages AWS best practices, our cost analysis, and our expertise with AWS funding programs to help identify and address the financial, technological, and operational challenges that a migration may entail. Using hard data from your on-prem infrastructure as well as our extensive experience in migrating environments of all sizes, we'll help you build a migration plan that aligns your business objectives while maintaining best practices for cost, security, and performance.

Migration Services
Competency

How it Works

First, we will guide you through the setup of our cost tool, AWS Migration Evaluator. This gathers data on the infrastructure in your data center and identifies ways to eliminate wasteful overprovisioning.

Then we will review this data and walk through discovery and planning phases. This includes identifying potential technical blockers, any financial implications or hurdles, as well as any knowledge or skill gaps that need to be addressed to ensure your team is equipped to migrate successfully and efficiently manage your infrastructure post-migration.

Benefits of Working With Mission

GET UNSTUCK WITH A STRATEGIC ROADMAPPING PLAN
Build organizational consensus around the path forward by outlining your successful migration to AWS.

LEVERAGE MISSION AND AWS FUNDING
We guide you to navigate AWS funding programs available for your workloads and ensure the most cost efficient process.

ACCURATE FORECASTING FOR OPTIMAL FINANCIAL PLANNING
With an emphasis on accurate financial forecasting, our MRA provides a **Total Cost of Ownership analysis** for increased certainty, transparency, and granularity for the factors driving cost.

UNDERSTAND YOUR LICENSING NEEDS
Licensing can have a dramatic impact on costs. We will help you determine your licensing needs and costs post-migration to avoid unwelcome surprises.

SAVE BIG
With greater insight into your cost drivers and actual utilization, you'll be able to better optimize your AWS environment while you migrate and realize substantial savings over a straight 'lift and shift' migration.

Contact Mission

Get your workloads funded, migrated, modernized, and performant with **AWS's #1 ranked Partner in the Migration Acceleration Program.** Reach out to your Account Executive or contact us directly today.

Mission Cloud is a next-generation cloud services provider, combining managed and professional services. We help businesses migrate, manage, modernize and optimize their AWS environments at every stage of their cloud journey.
